No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1981 articles are the same as those shown for current articles.

Contents of Volume 15

Number 1, March 1981

LINDA SWANSON AND CONSTANCE S. CAMPBELL. The Role of the Young in the Control of the Hormonal Events during Lactation and Behavioral Weaning in the Golden Hamster 1

SUSAN K. MCCONNELL, MICHAEL J. BAUM, AND THOMAS M. BADGER. Lack of Correlation between Naloxone-Induced Changes in Sexual Behavior and Serum LH in Male Rats .. 16

CHRISTOPHER L. COE, JEANETTE CHEN, EDNA L. LOWE, JULIAN M. DAVIDSON, AND SEYMOUR LEVINE. Hormonal and Behavioral Changes at Puberty in the Squirrel Monkey 36

GISELA EPPLE. Effects of Prepubertal Castration on the Development of the Scent Glands, Scent Marking, and Aggression in the Saddle Back Tamarin (*Saguinus fuscicollis,* Callitrichidae, Primates) 54

PATRICIA H. RUPPERT AND LYNWOOD G. CLEMENS. The Role of Aromatization in the Development of Sexual Behavior of the Female Hamster (*Mesocricetus auratus*) 68

JORGE F. RODRIGUEZ-SIERRA, EI TERASAWA, DAVID A. GOLDFOOT, AND DAVID DEWIED. Testosterone Potentiation of the Effectiveness of $ACTH^{1-24}$ on the Induction of the Stretch–Yawning Syndrome (SYS) in Male Guinea Pigs 77

CAROL DIAKOW AND AUDREY NEMIROFF. Vasotocin, Prostaglandin, and Female Reproductive Behavior in the Frog, *Rana pipiens* 86

N. E. VAN DE POLL, F. DE JONGE, H. G. VAN OYEN, J. VAN PELT, AND J. P. C. DE BRUIN. Failure to Find Sex Differences in Testosterone Activated Aggression in Two Strains of Rats .. 94

Number 2, June 1981

RICHARD E. WHALEN AND KATHIE L. OLSEN. Role of Aromatization in Sexual Differentiation: Effects of Prenatal ATD Treatment and Neonatal Castration 107

E. J. NORDEEN AND PAULINE YAHR. Activation and Differentiation of Sexual Behavior and Translocation of Hypothalamic Estrogen Receptors in Rats by 6α-Fluorotestosterone 123

ELIZABETH STEEL. Control of Proceptive and Receptive Behavior by Ovarian Hormones in the Syrian Hamster (*Mesocricetus auratus*) 141

GARY P. DOHANICH AND LYNWOOD G. CLEMENS. Brian Areas Implicated in Cholinergic Regulation of Sexual Behavior 157

RICHARD MCCARTY AND PAUL E. GOLD. Plasma Catecholamines: Effects of Footshock Level and Hormonal Modulators of Memory Storage 168
LYNWOOD G. CLEMENS AND STEVEN M. POMERANTZ. Male Sexual Behavior in Deer Mice (*Peromyscus maniculatus*) Following Castration and Hormone Replacement 183
MICHAEL J. MEANEY AND JANE STEWART. Neonatal Androgens Influence the Social Play of Prepubescent Rats 197
JOHN D. BUNTIN, CATHY CATANZARO, AND ROBERT D. LISK. Facilitatory Effects of Pituitary Transplants on Intraspecific Aggression in Female Hamsters 214
BRIEF REPORT
A. F. CRINE, S. BREDART, AND J. J. LEGROS. Effect of Exogenous Arginine Vasopressin on Rectal Temperature in the Albino Rat 226

Number 3, September 1981

DIANNE SCHECHTER, STEVEN M. HOWARD, AND RONALD GANDELMAN. Dihydrotestosterone Promotes Fighting Behavior of Female Mice 233
TAKEO MACHIDA, YUMIKO YONEZAWA, AND TETSUO NOUMURA. Age-Associated Changes in Plasma Testosterone Levels in Male Mice and Their Relation to Social Dominance or Sub-ordinance 238
J. BALTHAZART, G. MALACARNE, AND P. DEVICHE. Stimulatory Effects of 5β-Dihydrotestosterone on the Sexual Behavior in the Domestic Chick 246
GARY KEITH MALLOW. The Relationship between Aggressive Behavior and Menstrual Cycle Stage in Female Rhesus Monkeys (*Macaca mulatta*) 259
MASARU WADA. Effects of Photostimulation, Castration, and Testosterone Replacement on Daily Patterns of Calling and Locomotor Activity in Japanese Quail 270
BARBARA H. FADEM AND RONALD J. BARFIELD. Neonatal Hormonal Influences on the Development of Proceptive and Receptive Feminine Sexual Behavior in Rats 282
COLIN R. CLARK, NEIL J. MACLUSKY, BRUCE PARSONS, AND FREDERICK NAFTOLIN. Effects of Estrogen Deprivation on Brain Estrogen and Progestin Receptor Levels and the Activation of Female Sexual Behavior 289
ANNE M. ETGEN. Differential Effects of Two Estrogen Antagonists on the Development of Masculine and Feminine Sexual Behavior in Hamsters 299

ARTHUR I. FRANKEL. Hormone Release during Computer-Monitored Sexual Behavior in Mature and Aged Male Rats 312

INFORMATION FOR AUTHORS

Hormones and Behavior will publish original studies that treat of the relationships between the endocrine system and behavior, including the effects of hormones on behavior and of behavior-derived stimuli on endocrine function. Papers will be considered for publication with the understanding that they have not and will not be published elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Hormones and Behavior* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher. Reports of laboratory experiments, naturalistic field studies and clinical investigations will be equally acceptable as long as the necessary controls have been employed and results are presented in scientifically acceptable form. Manuscripts ordinarily will range between 7 and 12 double-spaced, typewritten pages. Brief reports presented in approximately 3–5 typewritten pages will be welcomed provided they represent full accounts of completed studies. Concisely written Letters to the Editors will be published when they are judged sufficiently constructive and comprehensive.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

1. *Manuscripts.* Submit three, double-spaced, typewritten copies, each including all figures and tables. Use white bond paper 8½ × 11 inches and leave 1-inch margins on all sides. Number pages consecutively but do not put page numbers on tables or figures. Include a separate, unnumbered *titled page* bearing the following items: (a) full title, (b) running title not to exceed 35 letters and spaces (c) name and addresses of individuals to whom proofs and other correspondence should be mailed (include Zip Code Number). Manuscripts can be sent to any of the Editors.

2. *Abstract.* An *abstract*, not to exceed 3–5% of the total length of the paper, should be typed double-spaced, on a separate unnumbered page. This abstract is to consist of a concise statement of the problem and the results; it will appear at the head of the published article *in lieu of a summary.*

3. *Headings.* Insofar as possible organize manuscripts in accordance with the following sequence of descriptive headings: METHODS, RESULTS, DISCUSSION, ACKNOWLEDGMENTS, REFERENCES. It is permissible to condense RESULTS AND DISCUSSION into a single section.

4. *Tables.* Type each table double-spaced on a separate sheet and head it with a descriptive title. Number tables consecutively with Arabic numbers in order of their mention in the text. Units of weights, measures etc. in the tables and text when used in conjunction with numerals are abbreviated and unpunctuated (e.g. 10% 50 ml, 3 gm. 8 cm). It is preferable that measurements of extent, weight, area, etc. be expressed in terms of the metric system. Footnotes in tables should be indicated by lower-case italic superscript letters.

5. *Illustrations.* Prepare *line drawings* (graphs, histograms, etc.) with India ink on tracing linen, smooth white paper or Bristol board. Copies can be submitted in the form of 1 × 10-inch glossy photographs with high contrast. All illustrations and lettering must be large enough to withstand at least 50% reduction in size. The maximum for reproduction of figures (i.e., line drawings and photographs) is 5 × 7½-inches. Number figures consecutively in order of their mention in the text. For each figure prepare a descriptive legend and type the legends for figures consecutively on a separate sheet in the order of their appearance in the text.

6. *Footnotes*. Use no footnotes unless absolutely necessary in which case type them, double-spaced, on a separate sheet in order of their citation. Refer to footnotes by superscript numbers in the text.

7. *References*. Cite references in the text by giving the surname of the author followed by the date of publication, e.g.: Smith (1962) found that . . .; however, contrary results have been reported (Brown, 1964). When a reference has two authors always cite both names. When more than two are involved the surnames of all authors are to be cited with the date at first mention, but in subsequent citations of the same reference give only the surname of the first author followed by the abbreviation *et al.* and the date. In citing more than one publication by the same author or authors in the same year add suffixes a, b, c, etc, after the year and repeat the identification in the bibliography. Under the subheading REFERENCES arrange the publications cited in the text alphabetically, according to the surname of the first author. The name of the author or authors is to be followed by the date, the full title of the article, and the name of the journal or book, e.g. Smith, C. V., Brown, B. S., and Jones, R. W. (1967). Effects of prolactin on maternal aggression in lungfish. *Am. J. Psychopharmacol.* **7**, 3–72. Abbreviations of the names of journals should be in accordance with the Publication Manual of the American Psychological Association or with those set forth in Chemical Abstracts' *Key to the Source Literature of the Chemical Sciences*, 1969 Edition.

8. *Radioimmunoassays*. Unpublished radioimmunoassays or significant changes in existing methods should be described in detail. All assay data should be accompanied by statistical validation (e.g., inter- and intra-assay variance).

9. *Reprints*. Authors will receive 50 free reprints and additional copies can be ordered. A reprint order form will accompany galley proof.
